security shutters

Application

Today, more than ever before, we need physical security to protect against vandalism, burglary or just for privacy and peace of mind. Increasingly, existing buildings are having security upgraded and new buildings are being designed to incorporate security.

Security shutters meet many of these threats to property and person. The emphasis behind our range of shutter designs is on integration into your building and way of life; unobtrusive, attractive and easy to use. Not bolted on as an afterthought but designed, manufactured and installed to complement the building and ensure they are effective and secure in daily use.

Modular in their design, security shutters can easily be adapted to suit many different applications and size requirements.

Making Security Effortless

Shutters that are frequently operated are greatly enhanced in use by automation. Opal employs the Somfy range of motors and controls. Somfy is widely regarded as the worldwide market leader in tubular motors and control systems for the automation of security shutters.

Single motor systems through to group command activated motors for multiple shutters, are all backed with Somfy's comprehensive warranty for added peace of mind. All powered shutter systems are CE marked in accordance with the Supply of Machinery (Safety) Regulations 1992.

Light, Vision and Security

Balancing the demands of security and display with a solution which meets concerns about crime yet still presents an 'open for window shopping' appearance is the strength of see-through security shutters.

Demanded by planners, or an opportunity for generating trade - vision is promoted with a range of designs suited to almost every application.

Retail shop fronts, commercial premises and offices seeking a less oppressive look to security have four profiles to choose from.

All shutters are able to mix solid and vision sections to optimise performance. Back lighting of the shutters combined with darker curtain colours greatly improves the perceived level of vision by virtue of the higher contrast between internal and external light levels.

Polycarbonate glazing is available with some designs to provide increased security.

4010 Standard Aluminium

- Manufactured from exceptionally strong extruded aluminium
- Medium security applications
- Spans widths up to 4000mm
- Can be powder coated in special colours if required
- Can be mixed with Vision slats where partial vision is required
- Very compact shutter box
- Available for use with high security guide rails
- Manual and motorised operation available

4020 Insurance Approved Aluminium

- Insurance Approved
- LPCB Certified
- Police preferred specification
- Higher security applications
- Spans widths up to 3000mm
- Can be powder coated in special colours if required
- Very compact shutter box
- Steel reinforced high security guide rails as standard
- Manual and motorised operation available

4030 Heavy Duty Aluminium

- A higher security profile for commercial applications.
- Very strong extruded aluminium profile
- Higher security applications on commercial / retail premises
- Spans widths up to 6000mm
- Can be powder coated special colours
- Effective heat and sound insulation
- Manual and motorised operation available

Olympian 4000 security shutters

4040 Commercial Steel

- Exceptionally strong security barrier
- Galvanised for corrosion resistance and powder coated
- Custom built for any opening
- Spans widths up to 6000mm
- Can be powder coated any RAL / BS colour
- Will reverse coil if required
- Manufactured with aluminium head box and guides for higher grade applications and easier installation, also available with traditional galvanised steel channels and head box
- Manual and motorised operation available

4050 Insurance Approved Steel

- Insurance Approved and LPCB Certified
- Police preferred specification
- Exceptionally strong security barrier
- Galvanised for corrosion resistance and powder coated
- Custom built for any opening
- Spans widths up to 6000mm
- Can be powder coated any RAL / BS colour
- Will reverse coil if required
- Manufactured with aluminium head box and guides for higher grade applications and easier installation, also available with traditional galvanised steel channels and head box
- Manual and motorised operation available

4060 Vision

- The new generation of roller grille - very tight coiling and alternative link patterns and spacing, gives outstanding light transmission.
- Internal use
- Strong extruded aluminium roller grille
- Delivers up to 69% vision
- Spans up to 5000mm (subject to appropriate application)
- Can be powder coated special colours if required
- Corporate logos can also be included
- Solid slats can be added to further enhance security
- Manual and motorised operation available
